

BACK OFF!!!!

XM Satellite Radio has done thier part in charging a fee for their service to appease people like the uptight recording industry people and people, like you, who, obviously, make decisions from a selfish perspective.

What do you care what kind of LEGAL, non-offensive information is provided by a reputable complany like XM?

With the country in the state it is currently in, don't you guys have better things to do than to sit around and complain about private services like XM?

It seems like offering traffic and weather updates on services like XM makes as much sense at the Weather Channel. What is the difference. It is a valuable service that provides valuable information that could, potentially, save someone's life.

Things like this are excatly why I have never voted and never will because you political "comedians" are all the same...a big joke! Unless it benefits you, you are against it. Do your job and make decisions that help the people not yourselves!
